DECEMBER 31, 2001

NOTE 1. UNAUDITED INTERIM FINANCIAL STATEMENTS

Interim financial statements of Gladstone Capital Corporation (the "Company") are prepared in accordance with generally accepted accounting principles ("GAAP") for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying annual financial statements prepared in accordance with GAAP are omitted. In the opinion of management, all adjustments, consisting solely of normal recurring accruals, necessary for the fair presentation of financial statements for the interim periods have been included. The current period's results of operations are not necessarily indicative of results that ultimately may be achieved for the year. The interim financial statements and notes thereto should be read in conjunction with the financial statements and notes thereto included in the Company's Form 10-K for the fiscal year ended September 30, 2001, as filed with the Securities and Exchange Commission.

NOTE 2. ORGANIZATION

The Company was incorporated under the General Corporation Laws of the State of Maryland on May 30, 2001 as a closed-end investment company. The Company has elected to be treated as a business development company under the Investment Company Act of 1940, as amended (the "1940 Act"). In addition, the Company has elected to be treated for tax purposes as a regulated investment company, or RIC, under the Internal Revenue Code of 1986, as amended (the "Code"). The Company's investment objectives are to achieve a high level of current income by investing in debt and equity securities of established private businesses.

Gladstone Advisers, Inc., a wholly-owned subsidiary, conducts the daily administrative operations of the Company.

On August 29, 2001, the Company closed its initial public offering and sold 9,430,000 shares of its common stock at \$15.00 per share, less an underwriting discount of \$1.05 per share and offering expenses of \$859,343, for total net proceeds to the Company of \$130,689,157.

NOTE 3. EARNINGS PER SHARE

The following table sets forth the computation of basic and diluted earnings per share.

Numerator for basic and diluted earnings per share	\$ 1,196,980
Denominator for basic weighted average shares	10,060,178

Dilutive potential shares	85,852
Denominator for diluted weighted average shares	10,146,030
Basic earnings per common share	\$0.12
Diluted earnings per common share	\$0.12

NOTE 4. NET ASSET VALUE PER SHARE

The Company's net asset value per share at December 31, 2001 was \$12.98 and at September 30, 2001 was \$13.05.

NOTE 5. DIVIDENDS

The Company is required to pay out as a dividend 90% of its ordinary income and short-term capital gains for each taxable year in order to maintain its status as a RIC under Subtitle A, Chapter 1 of Subchapter M of the Code. It is the policy of the Company to pay out as a dividend up to 100% of those amounts. The amount to be paid out as a dividend is determined by the Board of Directors each quarter and is based on the annual earnings estimated by the management of the Company. Based on that estimate, a dividend is declared each quarter. At year-end the Company may pay a bonus dividend, in addition to the quarterly dividends, to ensure that it has paid out at least 90% of its ordinary income and short-term capital gains for the year. The Company has a policy of retaining long-term capital gains and not paying them out as dividends.

On January 15, 2002, the Company paid a dividend of \$0.18 per share on its common stock to its stockholders of record as of December 31, 2001.

NOTE 6. INVESTMENT VALUATION

The Company carries its investments at fair value, as determined by the Board of Directors. Securities that are publicly traded are valued at the closing price on the valuation date. Debt and equity securities that are not publicly traded are valued at fair value as determined in good faith by the Board of Directors. In making such determination, the Board of Directors values non-convertible debt securities at cost plus amortized original issue discount, if any, unless adverse factors lead to a determination of a lesser valuation. In valuing convertible debt, equity or other securities, the Board of Directors determines the fair value based on the collateral, the issuer's ability to make payments, the earnings of the issuer, sales to third parties of similar securities, the comparison to publicly traded securities and other pertinent factors. Due to the uncertainty inherent in the valuation process, such estimates of fair value may differ significantly from the values that would have resulted had a ready market for the securities existed, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains ultimately realized on these investments to be different than the valuation currently assigned.

NOTE 7. LOAN AND MANAGERIAL ASSISTANCE FEES

The 1940 Act requires that a business development company make available managerial assistance to its portfolio companies. The company provides managerial assistance to its portfolio companies through its wholly-owned subsidiary, Gladstone Advisers, Inc. The Company receives fee income for managerial assistance it renders to portfolio companies in connection with its investments. Such fees are normally paid at the closing of the Company's investments and are non-recurring. These managerial assistance services vary by investment, but generally consist of reviewing existing credit facilities, arranging bank financing, arranging equity financing, structuring financing from multiple lenders, structuring financing from equity investors, restructuring existing loans, raising equity and debt capital and providing general financial advice. For the three months ended December 31, 2001, these fees totaled \$612,000.

From time to time, the Company will be invited to participate as a co-lender in a transaction. Where the Company does not provide significant managerial assistance services, loan fees paid to the Company in such situations will be deferred and amortized over the life of the loan.

THE FOLLOWING ANALYSIS OF OUR FINANCIAL CONDITION AND RESULTS OF OPERATIONS SHOULD BE READ IN CONJUNCTION WITH OUR FINANCIAL STATEMENTS AND THE NOTES THERETO CONTAINED ELSEWHERE IN THIS REPORT.

OVERVIEW

We were incorporated under the General Corporation Laws of the State of Maryland on May 30, 2001. Our investment objectives are to achieve a high level of current income by investing in debt securities, consisting primarily of senior notes, senior subordinated notes and junior subordinated notes, of established private businesses that are backed by leveraged buyout funds, venture capital funds or others, with a particular emphasis on senior subordinated notes. In addition, we may acquire existing loans that meet this profile from leveraged buyout funds, venture capital funds and others. We will also seek to provide our stockholders with long-term

capital growth through the appreciation in the value of warrants or other equity instruments that we may receive when we make loans. We operate as a closed-end, non-diversified management investment company, and have elected to be treated as a business development company under the Investment Company Act of 1940, as amended (the "1940 Act").

We seek out small and medium-sized businesses that meet certain criteria, including (1) the potential for growth in cash flow, (2) adequate assets for loan collateral, (3) experienced management teams with significant ownership interest in the borrower, (4) profitable operations based on the borrower's cash flow, (5) reasonable capitalization of the borrower (usually by leveraged buyout funds or venture capital funds) and (6) the potential to realize appreciation and gain liquidity in our equity position. We anticipate that this liquidity will be achieved through a merger or acquisition of the borrower, a public offering by the borrower or by exercise of our right to require the borrower to buy back its warrants. We lend to borrowers that need funds to finance growth, restructure their balance sheets or effect a change of control.

As a business development company, we make available significant managerial assistance to our portfolio companies. Such assistance typically involves closely monitoring the operations of each company, participating in its board and management meetings, being available for consultation with its officers and providing organizational and financial guidance.

Our loans typically range from \$5 million to \$15 million, mature in no more than seven years and accrue interest at a fixed rate or an annualized variable rate that exceeds the prime rate. Most, if not all, of the debt securities we acquire are unrated by credit rating agencies. To the extent possible, our loans generally are collateralized by a security interest in the borrower's assets. Interest payments are generally made monthly or quarterly with amortization of principal generally being deferred for several years. The principal amount of the loans and any accrued but unpaid interest generally become due at maturity at five to seven years. We focus on making loans accompanied by warrants to purchase stock in the borrowers. These warrants typically have a nominal exercise price and entitle us to purchase a modest percentage of the borrower's stock.

To date, we have made four investments for a total of approximately \$42 million with a commitment to lend up to an additional \$8 million to one of our portfolio companies under a revolving line of credit. In addition, we are earnestly working toward the consummation of more investments. These prospective loans are subject to, among other things, the satisfactory completion of our due diligence investigation of each borrower, acceptance of terms and structure and necessary consents. With respect to each prospective loan, we will only agree to provide the loan if, among other things, the results of our due diligence investigations are satisfactory, the terms and conditions of the loan are acceptable and all necessary consents are received. Our management has initiated its due diligence investigations of the potential borrowers, however we can not assure you that we will not discover facts in the course of completing our due diligence that would render a particular investment imprudent or that any of these loans will actually be made.

We carry our investments on our balance sheet at fair value, as determined by our board of directors. Securities that are publicly traded will be valued at their respective closing price

prices on the valuation date. Debt and equity securities that are not publicly traded are valued at fair value as determined in good faith by our board of directors. In making such determination, our board of directors values non-convertible debt securities at cost plus amortized original issue discount, if any, unless adverse factors lead to a determination of a lesser valuation. In valuing convertible debt, equity or other securities, our board of directors determines the fair value based on the collateral, the issuer's ability to make payments, the earnings of the issuer, sales to third parties of similar securities, the comparison to publicly traded securities and other pertinent factors. Due to the uncertainty inherent in the valuation process, such estimates of fair value may differ significantly from the values that would have resulted had a ready market for the securities existed, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains ultimately realized on these investments to be different than the valuation currently assigned.

We initially expected that it would take approximately one year to substantially fully invest the proceeds from our initial public offering. However, the terrorist attacks on the United States on September 11, 2001 and the ensuing economic uncertainty have resulted in a delay in the rate at which we have been able to enter into loans. We anticipate that we are approximately ninety days behind our original schedule for closing loans.

RESULTS OF OPERATIONS

OPERATING INCOME

Operating income for the quarter ended December 31, 2001 was approximately \$1.2 million. This amount consisted of approximately \$640,000 in interest income from our invested cash and cash equivalents, approximately \$330,000 in interest income from our investments in debt securities of private companies, approximately \$612,000 in non-recurring fee income and approximately \$107,000 in interest income from loans to our employees in connection with the exercise of employee stock options.

The interest on invested cash and cash equivalents primarily reflects the interest we received on the investment of the proceeds of our initial public offering in short-term investment grade securities during the quarter. As we acquire debt securities, we expect that income from invested cash and cash equivalents will decline as a percentage of total revenue and that interest income from debt securities will increase and become our predominant source of revenue.

Income from investments in debt securities of private companies was modest since we did not close our first investment until November 6, 2001 and the remaining three investments did not close until late December 2001. As we continue to invest the proceeds of our initial public offering in debt securities of private companies, we expect that we will generate additional income from these debt securities, which we anticipate will be at interest rates significantly greater than the rates that we are currently receiving on our deposited cash and cash equivalents.

As a business development company under the 1940 Act, we are required to provide significant managerial assistance to our portfolio companies. We provide these services, for which we receive fees, through our wholly-owned subsidiary, Gladstone Advisers, Inc. Such fees are only paid to us at the closing of the investments and are non-recurring. The specific services we provide vary by portfolio company, but generally consist of reviewing existing credit facilities, arranging bank financing, arranging equity financing, structuring financing from multiple lenders, structuring financing from equity investors, restructuring existing loans, raising equity and debt capital and providing general financial advice.

The only continuing revenue associated with our investments is interest paid on the loans we make and, potentially, capital gains received in connection with the liquidation of any associated equity interest (e.g., warrants).

OPERATING EXPENSES

Operating expenses for the quarter ended December 31, 2001 were approximately \$492,000. This amount consisted primarily of salaries and benefits, professional fees, rent and general and administrative expenses.

Salaries and benefits consisted of approximately \$277,000 for the quarter ended December 31, 2001; we expect this expense to increase as we hire additional loan officers. The remainder of the operating expenses incurred for the quarter ended December 31, 2001 consisted of approximately \$101,000 in professional fees, \$11,000 in rent and \$101,000 in general and administrative expenses.

We believe that this level of operating expenses is not necessarily indicative of our future operating expenses. We estimate that over time, as we begin to more fully deploy the proceeds of our initial public offering, our operating expenses will be approximately two percent of our net assets.

NET OPERATING INCOME

As a result of the operating income and operating expenses described above, we had net operating income of approximately \$1.2 million for the quarter ended December 31, 2001. Based on a weighted-average of 10,060,178 (actual) and 10,146,030 (fully diluted) shares outstanding, our net operating income per common share for the quarter ended December 31, 2001 was \$0.12, basic and fully diluted, respectively.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2001, we had investments in debt securities of four private companies, approximately \$42 million of total investment assets and a commitment to lend up to an additional \$8 million to one of our portfolio companies under a revolving line of credit.

Cash used by operating activities for the quarter ended December 31, 2001, consisting primarily of the items described in "Results of Operations," was approximately \$1.2 million. Net

cash used in investing activities was approximately \$42 million and primarily consisted of the amounts used to make investments in our four portfolio companies. Net cash used in financing activities was approximately \$640,000 for the quarter ended December 31, 2001 and consisted primarily of the repayment of accrued costs associated with our initial public offering.

During the quarter ended December 31, 2001, cash and cash equivalents decreased from approximately \$131.8 million at the beginning of the quarter to approximately \$90.4 million at the end of the quarter. This decrease of approximately \$41.4 million was largely the result of our investing activities, described above.

In order to qualify as a regulated investment company and to avoid corporate level tax on the income we distribute to our stockholders, we are required, under Subchapter M of the Internal Revenue Code, to distribute at least 90% of our ordinary income and short-term capital gains to our stockholders on an annual basis. In accordance with these requirements, on December 10, 2001, we declared a quarterly cash dividend of \$0.18 per share on our common stock which was paid on January 15, 2002 to stockholders of record as of December 31, 2001. This dividend was paid from ordinary income.

We anticipate borrowing funds to obtain additional capital once the proceeds of our initial public offering have been fully invested. We also intend to pursue a strategy of securitizing our loan portfolio in approximately two years. We would use the cash we receive upon the sale of interests in our loans to repay bank borrowings and make additional loans. We can not assure you that this securitization strategy will be successful.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are subject to financial market risks, including changes in interest rates. We expect that approximately 50% of the loans in our portfolio will be made at fixed rates, with approximately 50% made at variable rates. To date, we have made only four investments and substantially all of the remainder of our assets are invested in money market instruments.

We also expect to borrow funds to finance future lending activities after we have substantially fully invested the proceeds of our initial public offering. These future borrowings may be at fixed rates or variable rates. To date, we have not yet borrowed any funds.

We expect to hedge against interest rate fluctuations in the future by using standard hedging instruments such as futures, options and forward contracts. While hedging activities may insulate us against adverse fluctuations in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio of investments.
